

Seeding Success: Practical Consideration for Improving Alfalfa Establishment

Matt Digman, University of Wisconsin - Madison, WI

While alfalfa seeding equipment's technical development has lagged row-crops, producers have found new and innovative ways to ensure productive alfalfa stands even in the establishment year. This presentation will review the state of technology, best practices, and research in establishing alfalfa.

Matt Digman is an Assistant Professor of Biological Systems Engineering at the University of Wisconsin-Madison. He also served as Assistant Professor of Agricultural Engineering & Technology at the University of Wisconsin-River Falls. Prior to his time at UW, Matt worked as a research engineer at Kuhn North America, as well as a research engineer at the U.S. Dairy Forage Research Center.

Matt earned a B.S. in Mechanical Engineering from the Milwaukee School of Engineering and an M.S. and Ph.D in Biological and Biosystems Engineering from UW-Madison.
